

HAMMERON HAMMER FINISH

Product Scope

Buxly Hammeron Hammer Finish is durable, corrosion resistant decorative coating for ferrous and non-ferrous metals, certain plastics and wood. The decorative hammered appearance is smooth to the touch and sheds water well.

Product Application

Hammeron Hammer Finish does not need a primer or undercoat. It can be directly applied to metals, iron surfaces, fences, specific plastics and wooden structures.

Technical Information

Type	Single Pack
Composition	Resins, Pigments, Aluminum paste
Application	Spray
